-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Claims 12-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 23, 2004.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by German publication 29701895 [DE`895]. DE`895 (figures 1-11) teaches of a self closing slide comprising: a first slide member (17); a second slide member (21) slidably coupled to the first slide member; and a self closing mechanism (note fig. 5) coupled the second slide member comprising a housing (as viewed in fig. 5) comprising a spring (12) and an actuator (3) moveable in response to a force generated by the spring, wherein the first slide member slides over the spring. 2, wherein the first slide member comprises a web portion between two leg portions (note fig. 7) and wherein a slot (16) is formed on the web portion, wherein the slot formed on the first slide member is elongated (note fig. 6), wherein the slot formed on the first slide member comprises a first portion (left portion as depicted in fig. 6) extending to an end of the first slide member facing the self closing mechanism and a second portion (right portion as depicted in fig. 6) extending from the first portion and generally at an angle relative to the first portion,

Art Unit: 3637

wherein an edge of the first portion of the slot formed on the first slide member and an edge of the second portion of the slot formed on the first slide member define a tip (viewed as the element near the leader line of reference 16 as depicted in fig. 6) The self closing slide further comprising a third slide member (19) between the first and second slide members.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-11 & 16-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of U.S. Patent No. **6,712,435**. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the claimed limitations of the pending application are present in the cited U.S. Patent.

Art Unit: 3637

6. Claims 1-3, 10 & 16-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of U.S. Patent No. **6,733,097**. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the claimed limitations of the pending application are present in the cited U.S. Patent.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Anderson and German publication 4124512 describe self closing sliding members.
